

Call for Abstracts
2014 AEG Annual Meeting, Scottsdale, Arizona
Symposium Theme:

Land Subsidence and Earth Fissures

The Association of Environmental & Engineering Geologists (AEG) would like to invite you to submit an abstract for presentations to be given at the symposium focused on recent findings and current practice related to **Land Subsidence and Earth Fissures**. This technical program will be part of the 57th AEG Annual Meeting held in Scottsdale, Arizona from September 20-28, 2014. Abstracts should be submitted by **May 1, 2014**. Instructions for preparing and submitting an Abstract, along with a good example is available at:

<http://72.16.203.230/aegpapers/>

Username: AEG

Password: Scottsdale2014

Abstracts should be submitted via AEG (see above) with copies to Brian Conway at bdconway@azwater.gov. Once your submission is accepted, a confirmation notification will be sent via e-mail. **No submission of a formal paper is required**; however, the abstract will be published in the Annual Meeting Program.

Of particular interest to this symposium are topics related (but not limited) to:

- Land subsidence monitoring
- Earth fissure detection and monitoring
- Interferometric Synthetic Aperture Radar (InSAR)
- Land subsidence and earth fissure modeling/prediction
- Impacts of land subsidence and earth fissures on infrastructure
- Mitigation of land subsidence and earth fissures
- Case histories and current research
- Resource management and issues
- Mining impacts
- New technologies
